# iMAAX™

## *Want to be proactive in your operations?*

Introducing the iMAAX™ from Factrac. Your next solution for maximizing efficiencies in your operations. The iMAAX is an intelligent event manager designed to proactively monitor, alert, and take action of your operations.

The iMAAX™ monitors line operation events and can turn on / off multiple outputs including andon lights, horns, buzzers, and more. Send notifications when maintenance is due or machine faults have occurred. Create events to monitor count, speed, distance, time, takt and more.

| ID | Name | Description | State | Control |
|----|------|-------------|-------|---------|
| 1 | Input 0 PL 1 Alarm | Monitor Production Line 1 Alarm | Running | PAUSE RESTART STOP VIEW |
